Alan Lloyd, Chair
Economic and Technology Advancement Advisory Committee
California Air Resources Board
1001 I Street
Sacramento, CA 95812

Dear Chairman Lloyd,

I am writing to express my strong endorsement of Personal Rapid Transit as an available solution for helping to solve California's biggest source of GHG emissions, the automobile.

Recently I and another Marin Supervisor, Charles McGlashan, hosted a forum for Unimodal Inc. to discuss their PRT. It was well attended and widely received by the public. In fact, Marin County would love to have a SkyTran demonstration project along part of our congested Highway 101.

Another huge plus for Marin and for California is that PRT can be implemented without government subsidies for building the network system.

I commend the Air Resources Board and EETAC for their vision, and believe that a demonstration project of Personal Rapid Transit would be a perfect fit for Marin County.

I strongly urge you include PRT in your planning and implementation.

Best wishes,

A handwritten signature in cursive script that reads "Judy Arnold".
